

# Нова парадигма: Масовни отворени онлајн курсеви

Дејана Каваја Станишић, Универзитетска библиотека “Светозар  
Марковић”, Београд

Оја Кринуловић, Универзитетска библиотека “Светозар  
Марковић”, Београд

Миљана Тодоровић, Математички факултет, Универзитет у  
Београду

# Отворена наука

Отворено образовање је концепт новог начина учења, где сви велики светски универзитети покушавају да дигиталним садржајима, односно онлајн курсевима, конференцијама, семинарима приближе концепт образовања свима, па и онима који у том тренутку не могу да их похађају

# Масовни отворени онлајн курсеви - МООС

- У свету су све популарнији бесплатни онлајн едукативни курсеви које организују признати професори и стручњаци из различитих области.
- Да бисте пратили неки од ових курсева, све што Вам је потребно јесте рачунар, Интернет и мало слободног времена.

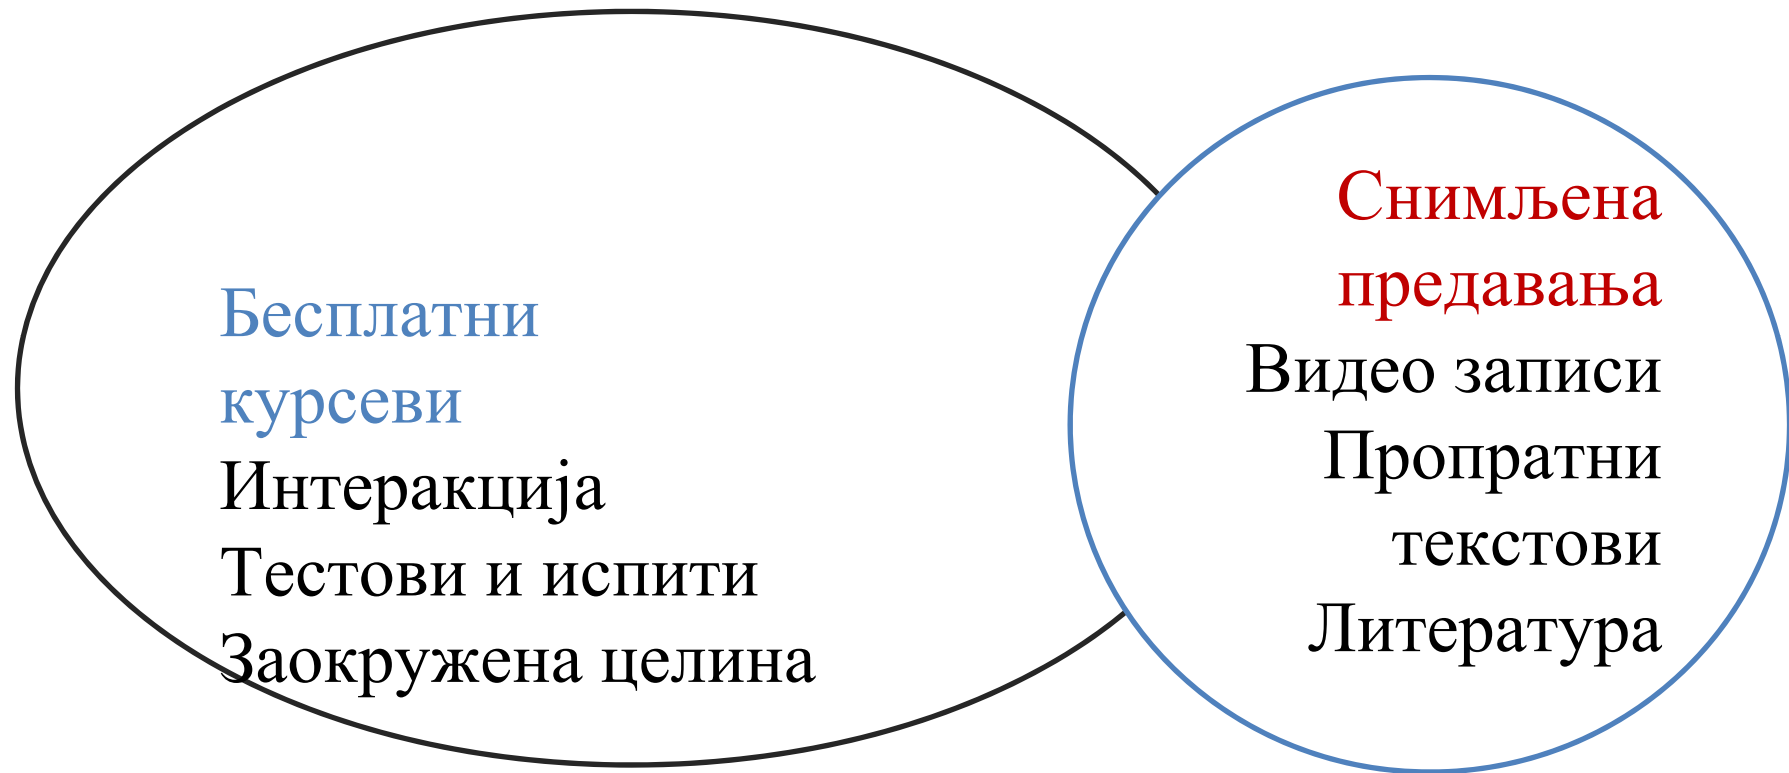

# Шта је MOOC

Massive  
Open  
Online  
Course

# Шта је отворено образовање

- Бесплатно образовање
- Престижни универзитети
- Квалитет

# Бесплатни курсеви и Снимљена предавања

Количина доступног материјала и временски приступ нису ограничени

# Садржај бесплатних курсева

- Видео лекције
- Према сопственом времену
- Есеји, лабораторија, вежбе
- Тренутне оцене
- Учење кроз сарадњу

# Сертификати

- Потврда о завршеном курсу
- Плаћени сертификат

# Пример добре праксе

- Battushig Myanganbayar, 15, Монголија
- Први бесплатни курс М.И.Т. на Coursera - Circuits and Electronics
- Стипендија за студирање на М.И.Т.

# Најпопуларније и највише коришћене платформе за бесплатне курсеве

**coursera**

[www.coursera.org](http://www.coursera.org)

**edX**

[www.edx.org](http://www.edx.org)

# Coursera

- Coursera нуди приступ различитим бесплатним онлајн курсевима са једног места.
- Учите од најбољих светских стручњака, учествујете у интерактивним вежбама и сами бирате место, време и дужину трајања курса.
- Приступите материјалима за учење са Универзитета Питсбург, Универзитета Дјук, Универзитета Харвард...
- Постоји могућност за комуникацију са другим полазницима курса.
- Тренутно нуди око 1800 курсева из разних области

# Learning How to Learn: Powerful mental tools to help you master tough subjects

University of California, San Diego

## How to Learn

### About this Course

This course gives you easy access to the invaluable learning techniques used by experts in art, music, literature, math, science, sports, and many other disciplines. We'll learn about the how the brain uses two very different learning modes and how it encapsulates ("chunks") information. We'll also cover illusions of learning, memory techniques, dealing with procrastination, and best practices shown by research to be most effective in helping you master tough subjects.

Using these approaches, no matter what your skill levels in topics you would like to master, you can change your thinking and change your life. If you're already an expert, this peep under the mental hood will give you ideas for: turbocharging successful learning, including counter-intuitive test-taking tips and insights that will help you make the best use of your time on homework and problem sets. If you're struggling, you'll see a structured treasure trove of practical techniques that walk you through what you need to do to get on track. If you've ever wanted to become better at anything, this course will help serve as your guide.

This course is also available in Portuguese. To join the fully translated Portuguese version, visit this page: <https://www.coursera.org/learn/aprender>

🗣 Subtitles available in **English, Arabic, Ukrainian, Portuguese (European), Chinese (Simplified), Greek, Italian, Vietnamese, Dutch, Russian, Spanish**

# English for Teaching Purposes

Universitat Autònoma de Barcelona

## About this Course

Thinking about teaching your university subject in English but it's not the Language you normally use?

Then, English for teaching purposes is the course for you. A course on English and teaching methodology that aims to help university lecturers do their teaching in English, in line with university internationalisation policies.

The course structure is the same for all learners and there are opportunities for them to link up with colleagues from universities all over the world who share the same discipline and discourse community, to ask questions and exchange ideas. This MOOC targets lecturers who wish to begin using English in their teaching. A priori, this means university lecturers from countries where English is not the L1 or a widely-used language (Romance language-speaking countries, for example), though in fact the course is open to teachers from all educational stages who want to teach through English, following the principles of EMI (English Medium Instruction).

On completing the course, you should be able to do the following.

a) Teach a university subject in English, having gained the necessary confidence and skills.

b) Integrate all aspects of CLIL (methodological, pedagogical, strategic, attitudinal, motivational, linguistic, sociolinguistic and pragmatic) to put together their own

# Music

An exploration of classical music as a living tradition. Top orchestral players from across the United States meet once-a-year in New York as the All-Star Orchestra to record masterpieces and new works with Music Director Gerard Schwarz. Come behind the scenes, meet the musicians, attend an open rehearsal, gain a conductor's perspective, and have a first-person encounter with the music.

🗨️ Community Questions

## Music basics

The basic principles of music are explained in plain language with helpful graphics and live video demonstrations. If you have ever wondered "How does music work?" then you'll find answers here. Presented by the All-Star Orchestra music director Gerard Schwarz.

Notes and rhythm

Reading music

## Masterpieces old and new

Discover what makes a masterpiece by learning how classical works are composed. Music Director Gerard Schwarz explains the history, context and compositional techniques behind famous orchestral works, from Beethoven to leading composers of the present day.

Ludwig van Beethoven:  
Symphony No. 5

Johannes Brahms: Academic  
Festival Overture

Pyotr Ilyich Tchaikovsky:  
Symphony No.4

Antonín Dvořák: Symphony No.  
9 "From the New World"

Robert Schumann: Symphony  
No. 3 "Rhenish"

Gustav Mahler: Symphony No. 2  
– 1st Movement

## Instruments of the orchestra

Learn about the different instruments of the orchestra as they are presented and demonstrated by principal players from famous symphony orchestras.

ALL CONTENT IN "MUSIC BASICS"

## Notes and rhythm

How are time, duration and rhythm expressed in musical notation? Find out here with easy-to-follow lessons presented by music director Gerard Schwarz, with video examples provided by the All-Star Orchestra

- Lesson 1: Note values, duration, and time signatures
- Lesson 2: Rhythm, dotted notes, ties, and rests
- Lesson 3: Meters in double and triple time, upbeats
- Lesson 4: Meters in 6, 9, and 12
- Lesson 5: Review of time signatures – Simple, compound, and complex
- Lesson 6: Constant versus changing time, adding triplets, and duplets
- Glossary of musical terms

## Reading music

Learn how to read music as music director Gerard Schwarz explains how notes, clefs, scales, flats and sharps work together in the context of musical notation, with performance examples provided by the All-Star Orchestra.

- Lesson 1: Staff, names of notes, treble clef
- Lesson 2: Ledger lines and the octave
- Lesson 3: Bass clef, grand staff and the octave
- Lesson 4: Reading music in treble clef and the C Major scale
- Lesson 5: C Major scale in bass clef and reading in bass clef

MUSIC BASICS  
Notes and rhythm

- Lesson 1: Note values, duration, and time signatures

### **Who is this course for?**

This course is designed for any learner of math and anyone who wants to improve their relationship with math. The ideas should be understandable by students of all levels of mathematics.

Parents who have children under age 13 and who think their children would benefit from some of the course materials should register themselves (i.e., parent's name, email, username) for the course. The parent may then choose to share course materials with their child at their own discretion.

### **What is the course structure?**

The course will consist of six short lessons, taking approximately 20 minutes each. The lessons will combine presentations from Dr. Boaler and a team of undergraduates, interviews with members of the public, cutting edge research ideas, interesting visuals and films, and explorations of math in nature, sport and design.

### **What is the pace of the course?**

The course will be self-paced, and you can start and end the course at any time in the months it is open. It is recommended that you take no more than one session a week, to allow the ideas to be processed and understood.

### **How will I be assessed?**

There will be no formal assessment. Participants will be asked to complete a pre-and post-survey. The course will include quizzes that combine opportunities to write, work on math and reflect. These will not be graded.

### **Does this course carry any kind of Stanford University credit?**

No.

## **INSTRUCTOR(S)**

### **Jo Boaler**

Professor of Mathematics Education

Dr. Jo Boaler is a Professor of Mathematics Education at Stanford University, and the founder of [www.youcubed.org](http://www.youcubed.org). She is the editor

# How to Learn Math: For Students

REGISTER FOR EDUC115-S

overview

## ABOUT THIS COURSE

How to Learn Math is a free self paced class for learners of all levels of mathematics. It combines really important information on the brain and learning with new evidence on the best ways to approach and learn math effectively. Many people have had negative experiences with math, and end up disliking math or failing. This class will give learners of math the information they need to become powerful math learners, it will correct any misconceptions they have about what math is, and it will teach them about their own potential to succeed and the strategies needed to approach math effectively. If you have had past negative experiences with math this will help change your relationship to one that is positive and powerful.

The course will feature Jo and a team of undergraduates, as well as videos of math in action - in dance, juggling, snowflakes, soccer and many other applications. It is designed with a pedagogy of active engagement. The course will open in mid June and stay open indefinitely.

## CONCEPTS

### Part 1: The Brain and Math Learning.

#### 1. *Knocking Down the Myths About Math.*

Everyone can learn math well. There is no such thing as a "math person". This session give stunning new evidence on brain growth, and consider what it means for math learners.

## Course Updates & News

---

 **JUNE 22, 2014**

Welcome to Week 2!

I hope that you are enjoying and benefiting from the course. It has been great to read your forum discussions and other comments. I wanted to give you some feedback to 4 questions I have seen a lot:

1) How fast should you take the course?

My recommendation is not to go too quickly through the course, as some of the ideas have a lot of depth and you will give yourself more chance of really learning them if there is space between sessions. I recommend a few days between each session.

2) Is there no such thing as natural genius?

Although there is widespread belief in the US that some people are naturally good at math and some not, this idea has been widely disputed by researchers - in particular brain researchers. A good recent article to read is this one:

## The OU on iTunes U

### What is iTunes U

iTunes U is a vast learning resource offering free educational content that users can download from Apple's iTunes Store straight to their computer or mobile devices. The Open University joined iTunes U in 2008, making available a range of high quality audio-visual assets used in their courses. Featuring over 280 albums with content from more than 136 courses, the OU on iTunes U reflects the diversity and strength of the University's curriculum and academic brand.

### A fantastic learning experience on offer

Along with audio-visual course content, the repository features specially commissioned topical pieces in which academic experts contextualise events and anniversary-led content within a knowledge framework; for example, the re-launch of the Large Hadron Collider, the 40th anniversary of the Internet and the 250th anniversary of Handel. The OU on iTunes U also showcases OU Research, with a section devoted to research

## Getting started on iTunes U

### Step 1

#### Download and install iTunes

iTunes is available to download and install from Apples website:

[www.apple.com/itunes/how-to](http://www.apple.com/itunes/how-to)

### Step 2

#### Introduction to iTunes U

You can find out more about iTunes U by visiting Apple's website:

[www.apple.com/education/itunes-u/whats-on.html](http://www.apple.com/education/itunes-u/whats-on.html)

### Step 3

#### Launch the OU on iTunes U

# iTunes.

Your movies, TV shows, and music  
take center stage.

iTunes is the best way to organize and enjoy the music, movies, and TV shows you already have — and shop for the ones you want to get. You can even tune in to Beats 1 radio, presented by Zane Lowe and a team of acclaimed DJs. Enjoy all the entertainment iTunes has to offer on your Mac and PC.

# All the best entertainment is just a download away.

# Earthquake

KQED, California Academy of Sciences

Details Ratings and Reviews Related

## Description

What are earthquakes? Gain a new perspective on these powerful phenomena with this iTunes U course co-produced by the California Academy of Sciences and Northern California public media provider KQED. Designed for middle- and high-school science educators to broaden their own knowledge and use with students, the course weaves together activities, videos, and classroom-ready materials into a primer on how plate tectonics shape Earth's surface and directly impact people's lives.

Create a simple math magic trick in Java.

---

## UNIT 2: CONDITIONALS AND CONTROL FLOW

 Learn

Java is a programming language designed to build secure, powerful applications that run across multiple operating systems, including Linux, Mac OS X, and Windows. The Java language is known to be flexible, scalable, and maintainable.

We will begin with the fundamentals of Java programming: *data types*, *arithmetic*, and *operators*. We'll learn a few concepts that you can apply to the programs you create. By the end of the course, you'll be familiar with the basic building blocks of a Java program.

 Instructions

1. Let's get started by getting to know each other.

On line 4, type your name within double quotes between the parentheses like this:

```
System.out.println("Gilberto");
```

 Report a Bug

YourName.java

```
1 public class YourName {
2     public static void main(String[] args) {
3
4         System.out.println();

# Друштвене мреже и учење

- Друштвене мреже више се не користе само у слободно време и само за забаву. Након фазе у којој су друштвене мреже, попут Twitter-а и Facebook-а, својим корисницима свакодневно представљале информативни садржај, све је присутнији тренд обезбеђивања приступа материјалу едукативног карактера путем друштвених мрежа. Све се чешће на друштвеним мрежама могу пронаћи странице на којим су представљени портали који се баве масовним онлајн образовањем, а професори који на њима предају веома често користе Twitter за дељење информација и комуникацију са студентима, а видео снимци предавања постављају се на YouTube.

## Инфо

Друштвене мреже више се не користе само у слободно време и само за забаву. Након фазе у којој су друштвене мреже, попут Twitter-а и Facebook-а, својим корисницима свакодневно представљале информативни садржај, све је присутнији тренд обезбеђивања приступа материјалу едукативног карактера путем друштвених мрежа. Све се чешће на друштвеним мрежама могу пронаћи странице на којим су представљени портали који се баве масовним онлајн образовањем, а професори који на њима предају веома често користе Twitter за дељење информација и комуникацију са студентима, а видео снимци предавања постављају се на YouTube. Ова страница водича кроз масовне онлајн курсеве намењена је овој тематици.

## Izzui - Facebook апликација за учење

Izzui је ново место на интернету на коме можете да учите и делите своје знање! Izzui Вам дозвољава да постављате едукативни садржај и презентације онлајн, да позовете пријатеље са друштвених мрежа да их погледају и да се претплатите на садржај који постављају други људи. На тај начин можете да пратите курсеве, од којих су неки бесплатни. Овде такође можете да оцењујете и остављате коментаре о садржају који је постављен, као и да све своје активности поставите на свој Facebook профил.

## Twitter и онлајн образовање

За комуникацију између људи сличних интересовања на Twitter-у се често користе "хаштагови", односно речи које се пишу са знаком # испред. Захваљујући њима, све што било ко напише на одређеној теми, сортира се заједно и омогућава лакше претраживање и проналажење одређене информације. Уколико Вас занима онлајн учење, покушајте са хаштаговима као што су: #fflearnpro, #adobe, #adobecaptivate, #adultlearn, #andragogy, #articulate, #astd, #authoringtools, #camtasia, #captivate, #content, #devlearn, #digped, #doceos, #ebooks, #edapp, #edchat, #edtech, #edtools, #edu, #education, #edumoooc, #edupunk, #edutech, #efront, #efronters, #elearindustry, #elearn, #elearnapp, #elearnblog, #elearnbooks, #elearning, #elearningbrazil, #elearningitaly, #elearningjobs, #elearnpros, #elearntools, #eLGuild, #elt, #esl, #flash, #flipchat, #flipclass, #free, #freelms, #gbl, #highered, #homeschool, #HTML5, #id, #idbooks, #idjobs, #idrtg, #infographic, #instructionaldesign, #ipad, #ipaded, #ispringpro, #jing, #k12, #k12Live, #k12online, #kid, #kidsapp, #LD, #learning, #Learnist, #livedclass, #lms, #lmschat, #math, #mlearn, #mLearning, #mlearning, #mobilelearning, #moodle, #moodlers, #myresourcedcloud, #newEdblogs, #nptech, #onlinelearning, #onlinelearning, #onlinelearning, #opened, #opensource, #PATeach, #pblchat, #pd, #readwriteweb, #scon3, #smartboards, #sociallearn, #storyline, #talentlms, #teaching, #teachpreschool, #training, #training, #tutorials, #videolearning, #videorials, #visualthinking, #VocEd, #web20.

Linux - Wikipedia, the free encyclopedia

From Wikipedia, the free encyclopedia

This article is about the operating system. For the kernel, see Linux kernel. For other uses, see Linux (disambiguation).

**Linux** (pronounced /ˈlɪnɪks/ *LI-niks* or, less frequently, /ˈlɪnəs/ *LI-nəz*) is a Unix-like and mostly POSIX-compliant computer operating system (OS) assembled under the model of free and open-source software development and distribution. The defining component of Linux is the Linux kernel,<sup>[a]</sup> an operating system kernel first released on 5 October 1991 by Linux Torvalds.<sup>[b]</sup> The Free Software Foundation uses the name GNU/Linux to describe the operating system, which has led to some controversy.<sup>[1][12]</sup>

Linux was originally developed as a free operating system for personal computers based on the Intel x86 architecture, but has since been ported to more computer hardware platforms than any other operating system.<sup>[11]</sup> Thanks to its dominance on smartphones, Android, which is built on top of the Linux kernel, has the largest installed base of all general purpose operating systems.<sup>[14]</sup> Linux, in its original form, is also the leading operating system on servers and other big iron systems such as mainframe computers and supercomputers.<sup>[15][16]</sup> but is used on only around 1.5% of desktop computers.<sup>[17]</sup> Linux also runs on embedded systems, which are devices whose operating system is typically built into the firmware and is tightly tailored to the system; this includes mobile phones.<sup>[18]</sup> tablet
