AB: Diabetic Nephropathy is one of the microvascular complications associated with type 1 diabetes mellitus with a major portion of the excess morbidity and mortality. In order to avoid or at least delay its onset we should detect a very small amount of proteins in the urine (between 15-20 and 200 micrograms/min.) that is a strong predictor of those likely to progress to overt nephropathy. This detection can be obtained evaluating an overnight sample of urine and suggest preventives interventions. such as intensive diabetes management and angiotensin converting enzyme inhibition (ACEi). Furthermore, associated risk factors should be prevented or treated (hypertension, retinopathy, hyperlipidemia and smoking).

PROTOONCOGENE PROTEINS + analysis and metabolism
Bcl-2 and Bax proteins are coded by a family of genes that take part
in the maintenance of the balance between cell proliferation rate
and programmed cell death in multicellular organisms. The bax
gene acts as promoter of cell death by opposing the death
protector effect of the bcl-2 gene. Expression of the Bcl-2
Bax proteins has been investigated in correlation to the p53 and
Rb proteins, to the proliferating indices PCNA, Ki-67 and I as
well as to the conventional clinicopathological parameters
breast cancer tissue. The monoclonal antibodies anti-bcl-2
(Dako), Rb (AB-5-Oncogene), DO-7 (IgG2b-YLEM) and polyclonal
anti-human Bax (Farmigen), were used and the avidin-biotin and
immunoperoxidase method were applied. Bcl-2 and Bax proteins

VESTI

> Članci naših autora u servisu Web of Science
Od septembra meseca ove godine svake nedelje ćemo formirati listu članaka istraživača iz Srbije, a koji su referisani u okviru servisa Web of Science. Svim autorima čije elektronske adrese imamo prosleđivaćemo informaciju o njihovim objavljenim radovima. Spisak svih autora i njihovih radova u toku poslednje sedmice dostupan je na: [Spisak članaka](#)

> Scopus - zajedničko pretraživanje 14000 svetskih naučnih časopisa
U narednih mesec dana omogućeno nam je da testiramo novi servis Scopus (izdavač Elsevier B.V). Najavljujemo da će prezentacija svih mogućnosti Scopus-a biti održana sredinom marta u Narodnoj biblioteci Srbije. Probni period traje do 5. marta 2005. godine. Web adresa : www.scopus.com (podešavanje Internet Browser-a kao za [Science Direct](#)). Ako imate otvoren proxy nalog, Scopus-u prilazite preko spiska ponuđenih servisa.

> Zajednički pretraživač otvorenih arhiva
Od 01.2005. god. možete koristiti probnu verziju novog servisa [Zajednički pretraživač otvorenih arhiva](#). Zajednički pretraživač obuhvata članke, doktorske disertacije i digitalne arhive.

Abstract

It has been reported that diabetes-induced inappropriate apoptosis in embryos during gastrulation may be one of the mechanisms leading to neural tube defects. We studied apoptosis and the apoptotic pathway occurring in early post-implantation period embryos of non-diabetic and streptozotocin (STZ)-induced diabetic rats. In quantitative RT-PCR, *Bax* mRNA was constantly expressed to similar degree in embryos of non-diabetic and diabetic rat, while the expression of *Bcl-2* mRNA was significantly decreased in diabetic rat embryos compared to non-diabetic rat embryos. The increased number of terminal deoxynucleotidyl transferase-mediated nick end labeling (TUNEL)-positive cells occurred selectively in the primitive brain of diabetic rat embryos compared to non-diabetic rat embryos. Immunohistochemical studies revealed that, in rat embryos, the staining of *Bax* and activated caspase-3 were observed in the TUNEL-positive cell area, but the expression of *Bcl-2* in these apoptotic cells was generally too low to be detected. These results suggest that a *Bax*-regulated mitochondrial cytochrome *c*-mediated caspase-3 activation pathway might be involved in the diabetic embryopathy.

NALOG ZA OTVARANJE LIČNOG KORISNIČKOG IMENA
NA
SERVERU NARODNE BIBLIOTEKE SRBIJE

Molimo vas da pažljivo pročitate sledeću licencu, a koja će Vam ukazati na način korišćenja ovog naloga.

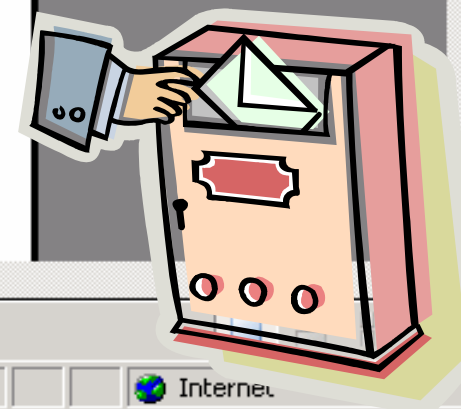

Pre upotrebe svog naloga u Narodnoj biblioteci Srbije potvrđujem sledeće:

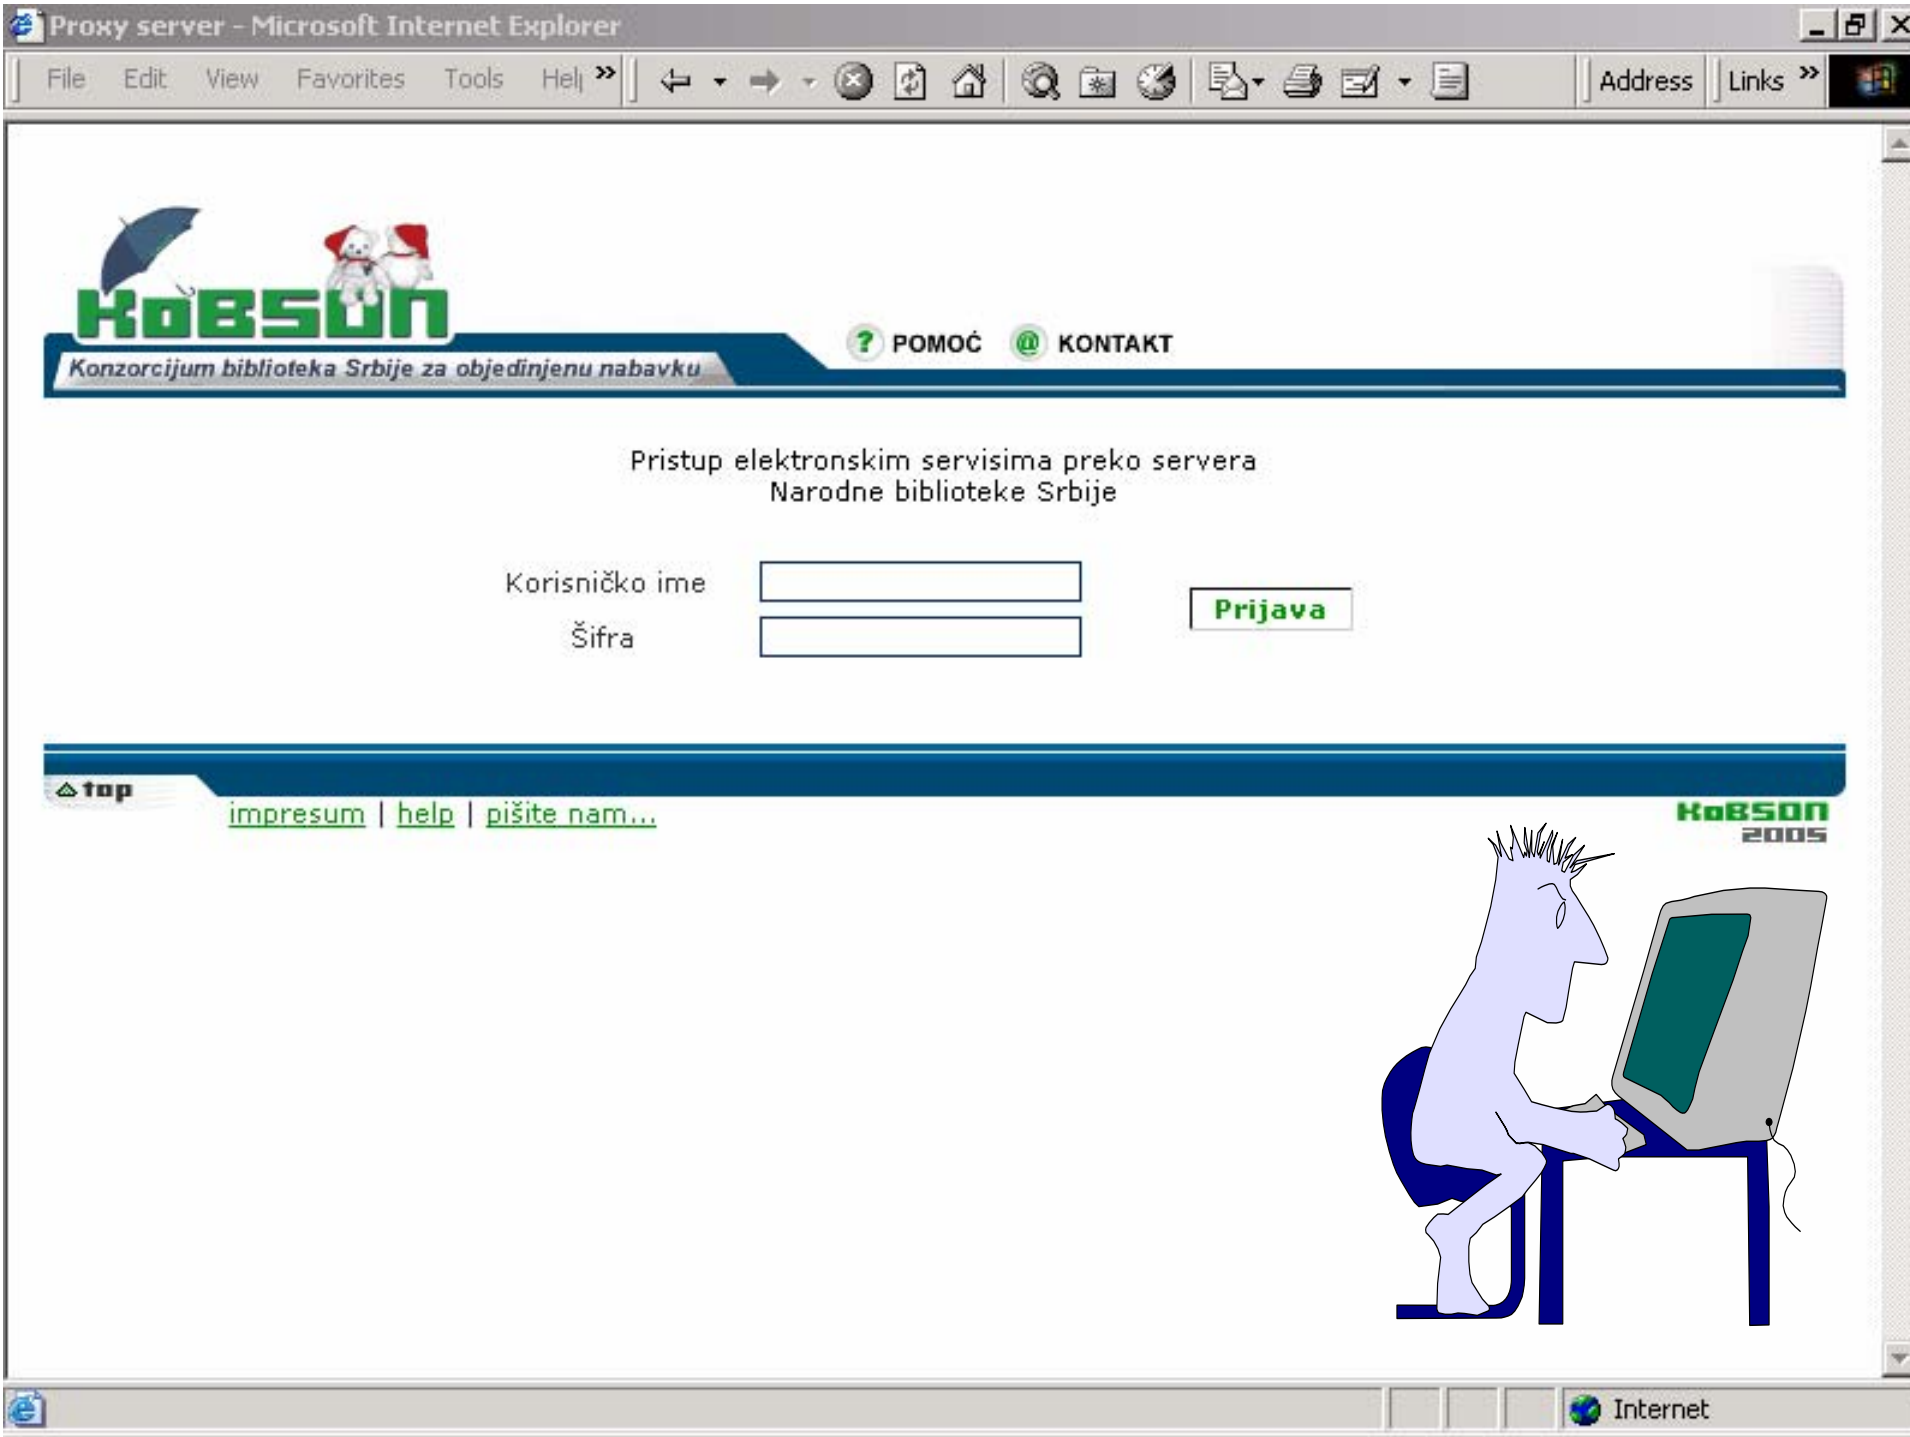

- ♦ Ja sam u ovom trenutku zaposlen/-a na Univerzitetu, Institutu ili Zdravstvenoj ustanovi čiji je osnivač Republika Srbija.
- ♦ Preuzete članke ću koristiti samo za svoj vlastiti akademski rad radi dostizanja naučnog zvanja, podučavanja studenata, ili u istraživanjima koja finansiraju vlada ili neprofitne organizacije, a koja su namenjena objavljivanju u javno dostupnoj literaturi.
- ♦ NEĆU PREUZIMATI na svoj računar celokupne sveske časopisa (puni tekst časopisa, od korica do korica), jer je to protivno potpisanoj licenci.
- ♦ NEĆU KORISTITI preuzete članke za komercijalna istraživanja, npr. za istraživanja koja se sprovode u okviru konsultantskih ugovora i čiji se rezultati dostavljaju profitnim organizacijama, ili za istraživanja koja mogu dovesti do patenta.
- ♦ Koristiću rezultate pretraga u skladu sa uobičajenom praksom za akademika istraživanja, i poznato mi je da ih mogu šaljati u elektroničkoj formi. Rezultate pretraživanja mogu da delim sa drugim studentima i zaposlenima na Univerzitetu na ograničen, razuman način, ali neću objedinjavati svoje rezultate pretraga sa tuđim rezultatima.
- ♦ Poznato mi je da se registruje svaki pristup elektronskim servisima preko ovog naloga, i da će ti podaci biti korišćeni samo za izborno praćenje korišćenja elektronskih izvora.
- ♦ Poznato mi je da će mi pristup elektronskim servisima biti onemogućen, ukoliko svoj nalog budem koristio/la suprotno navedenim pravilima.
- ♦ Poznato mi je da je Licenca za upotrebu baza važeća na teritoriji Republike Srbije, i da kršenje licence od strane bilo kog korisnika može dovesti do raskida ugovora za sve korisnike iz Srbije.

Uniform Requirements for Manuscripts Submitted to Biomedical Journals

Updated October 2001

Publication Ethics: [Sponsorship, Authorship, and Accountability](#)

International Committee of Medical Journal Editors (see [end of text](#))

A small group of editors of general medical journals met informally in Vancouver, British Columbia, in 1978 to establish guidelines for the format of manuscripts submitted to their journals. The group became known as the Vancouver Group. Its requirements for manuscripts, including formats for bibliographic references developed

Redosled reči

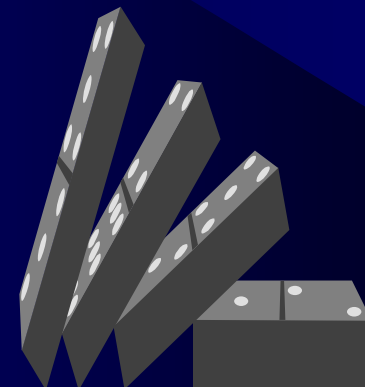

Značaj primene deskriptora

- to je svetski standard
- po njima autori ili bibliotekari pretražuju baze podataka i traže literaturu po određenoj temi
- po njima će dati rad biti prepoznat i moći će na isti način da se pronađe u celom svetu

- deskriptori su na engleskom te su jednoobrazni
- mogu se vršiti razna scientometrijska ispitivanja i analize
- za časopise za stvaranje indeksa pojmova tj. indeksa ključnih reči
- zahtev uredništva časopisa

Cystic Fibrosis

TERM NOTES:
DEFINITION OF TERM: An inherited disease of exocrine glands, affecting most characteristically the pancreas, respiratory system, and sweat glands, usually beginning in infancy and typified by chronic respiratory infections, pancreatic insufficiency, and susceptibility to heat prostration. Cirrhosis of liver occurring in childhood is common and may produce portal hypertension, splenomegaly, and hypersplenism.
