

KoBSON

Pretraživanje elektronskih časopisa po  
naslovu, naučnoj disciplini i ključnim rečima

<http://kobson.nb.rs>  
KoBSON@nb.rs  
Maj, 2011, Beograd

## Teme

- Pretraživanje časopisa po naslovu
- Pretraživanje časopisa po naučnoj disciplini
- Pretraživanje po temi (ključnim rečima)
- Pretraživanje baza sažetaka i citata (Medline, Scopus, WoS)

## Podaci o časopisu

ISSN	0022-0000
Naslov	Journal of Computer & System Sciences
Status	Active
Tip dokumenta	Academic/Scholarly
Učestalost	8 times a year
Jezik	Text in English
Prvi broj	1967
Abstrakt	Publishes original research papers on computer science and in system science, with emphasis on pertinent mathematical theory and its applications.
Alternativni naslovi	Online "e" text edition; ISSN 1090-2724

## U bibliotekama Srbije (u COBISS-u)

Od - do	Biblioteka	Brojevi telefona
1984-1993	Institut "Mihajlo Pupin", BEOGRAD	2755-171, 2776-222 lok 309

The screenshot shows the KoBSON website interface. At the top right, there are navigation links: "Tražite" (with a search input field), "Udaljeni pristup", "Mapa sajta", and "Odjava". The KoBSON logo is on the left, with the IP address "IP: 147.91.1.45, KoBSON" below it. A breadcrumb trail reads "Početak / SERVISI / Pretraživanje časopisa /". A secondary navigation bar includes "EleČas", "EleKnjige", "Naši u WOS", "Pomoć", and "Impresum". On the far right, there are social media icons for RSS, email, and a phone. A left sidebar menu lists various services, with "Pretraživanje časopisa" highlighted. The main content area is titled "Pretraživanje časopisa" and contains a search form with fields for "reči u naslovu časopisa" and "ISSN". A dropdown menu for "kategorija" is open, showing the option "izaberite kategoriju". A "Pretraživanje" button is located below the dropdown. The page also features decorative umbrella icons in the top right corner.

DOI 10.1016/j.copbio.2008.08.009

**Michael Betenbaugh**  
Johns Hopkins University, Baltimore, MD 21218,  
United States  
e-mail: [beten@jhu.edu](mailto:beten@jhu.edu)

Michael Betenbaugh is professor of  
Chemical and Biomolecular

Metabolic engineering was envisioned as a new scientific endeavor nearly two decades ago; thanks to two breakthrough papers published by Jay Bailey <http://dx.doi.org/10.1126/science.2047876> (Toward a science of metabolic engineering. *Science* 1991, 252:1668–1675) and Joe Valino and Greg Stephanopoulos <http://dx.doi.org/10.1126/science.1904627> (Network rigidity and metabolic engineering in metabolite overproduction. *Science* 252:1675–1681). Although early successes relied upon the transformation of enzymes or short

## Servisi po disciplinama

35 000 časopisa, 20 servisa

- ❖ Biomedicinske nauke SD, PQ, EB, SP, HI, HW, WI, OX, CU, OV
- ❖ Klinička medicina EB, SD, SP, HI, HW, WI, OV
- ❖ Prirodne nauke SD, PQ, EB, SP, CU
- ❖ Poljoprivreda, Šumarstvo i Zaštita životne sredine SD, SP
- ❖ Tehničke nauke, Računarstvo IE, SD, EM, EV, CU
- ❖ Društvene nauke JS, EM, EB, SD, SG, OX, CU
- ❖ Umetnost i humanističke nauke JS, EB, OX
- ❖ Fizika IE, SD, AP, SP, IO
- ❖ Hemija AC, SD, RSC
- ❖ Pravne nauke HE
- ❖ Sve naučne discipline SD, EB, PQ, CU

## Agregatori i izdavači

### Dostupni izdavači:

AC, AP, CU, EM, IE, IOP, OX, SG, SD, SP,  
WI, ASME, RSC

(puni tekstovi članaka često dostupni el. pre njihovog štampanja u papirnoj formi)

### Dostupni agregatori:

EB, FM, HE, HW, HI, JS, PQ, TE, OV

(baze koje sadrže časopise više izdavača, često sadrže "embargo" period 3, 6 ili 12 meseci)

# Bulovi operatori

AND	Finds documents containing all of the specified words or phrases. Peanut AND butter finds documents with both the word peanut and the word butter.
OR	Finds documents containing at least one of the specified words or phrases. Peanut OR butter finds documents containing either peanut or butter. The found documents could contain both items, but not necessarily.
AND NOT	Excludes documents containing the specified word or phrase. Peanut AND NOT butter finds documents with peanut but not containing butter. NOT must be used with another operator, like AND.
NEAR	Finds documents containing both specified words or phrases within 10 words of each other. Peanut NEAR butter would find documents with peanut butter, but probably not any other kind of butter.
*	The asterisk is a wildcard; any letters can take the place of the asterisk. Bass* would find documents with bass, basset and bassinet. You must type at least three letters before the *. You can also place the * in the middle of a word. This is useful when you're unsure about spelling. Colo*r would find documents that contain color and colour.

# Pretraživanje po temi ili ključnim rečima

The screenshot displays the KoBSON website interface. At the top, there are navigation tabs: CPH, SRL, EleČas, EleKnjige, Naši u WOS, Pomoć, and Impresum. On the left, a vertical menu lists various categories and publishers, with 'Pretraživanje časopisa' and 'Elektronski časopisi' highlighted. The main content area is titled 'Elektronski časopisi' and contains text explaining that KoBSON provides full-text access to journals from 1997 onwards. It lists four methods for searching: (1) directly on the publisher's website, (2) on the publisher's website, (3) on aggregator websites (EBSCO, ProQuest), and (4) on index databases (Web of Science, Scopus, Scindeks). Below this, a section titled 'Elektronski časopisi:' states that the titles of subscribed publishers are available in full text. A table lists these publishers with their abbreviations and full names. The 'Science Direct' entry is circled in red. On the right, a sidebar contains various user-related links and information, such as 'NOVI KORISNICI', 'KAKO KORISTITI KoBSON', and 'ČESTA PITANJA O:'. The bottom of the page features a blue footer area.

Elektronski časopisi

Kod većine izdavača KoBSON pretplaćuje časopise u punom tekstu od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta. Predmetna, ili autorska, pretraživanja po člancima, moguće je obaviti:

- (1) na veb stranici izdavača izabranog iz menija, korišćenjem opcije brzo pretraživanje
- (2) na veb stranici izdavača
- (3) na veb stranicama agregatora (EBSCO, ProQuest)
- (4) indeksne baze (Web of Science, Scopus, Scindeks)

**Elektronski časopisi:**  
Skup pretplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

Izdavači:

AC	American Chemical Society
AP	American Institute of Physics
PA	American Psychological Association
ME	ASME Transaction Journals
CU	Cambridge University Press
EM	Emerald Publishing
IE	IEEE Digital Library
IO	Institute of Physics Publishing
OX	Oxford University Press

- Academic Search Premier**  
This multi-disciplinary database provides full text for more than 4,600 journals, including full text for nearly 3,900 peer-reviewed titles. PDF backfiles to 1975 or further are available for well over one hundred journals, and searchable cited references are provided for more than 1,000 titles.  
[Title List](#) [More Information](#)
- Business Source Premier**  
*Business Source Premier* is the industry's most used business research database, providing full text for more than 2,300 journals, including full text for more than 1,100 peer-reviewed titles. This database provides full text back to 1886, and searchable cited references back to 1998. *Business Source Premier* is superior to the competition in full text coverage in all disciplines of business, including marketing, management, MIS, POM, accounting, finance and economics. This database is updated daily on EBSCOhost.  
[Title List](#) [More Information](#) [Enhanced Business Searching Interface](#)
- ERIC**  
*ERIC*, the Education Resource Information Center, contains more than 1.3 million records and links to more than 323,000 full-text documents dating back to 1966.  
[More Information](#)
- Health Source - Consumer Edition**  
This database is the richest collection of consumer health information available to libraries worldwide, providing information on many health topics including the medical sciences, food sciences and nutrition, childcare, sports medicine and general health. *Health Source: Consumer Edition* provides access to nearly 80 full text, consumer health magazines.  
[Title List](#) [More Information](#)
- Health Source: Nursing/Academic Edition**  
This database provides nearly 550 scholarly full text journals focusing on many medical disciplines. *Health Source: Nursing/Academic Edition* also features the *Lexi-PAL Drug Guide*, which covers 1,300 generic drug patient education sheets with more than 4,700 brand names.

## Kratko uputstvo o pretraživanju

Pretraživanje baze TEEAL moguće je na dva načina:

1. - unesite reči ili prva slova reči razdvojene razmakom (corn biochem); možete koristiti Bulove operatore, a ukoliko ih ne navedete podrazumevani operator je AND. Reči se pretražuju iz naslova, ključnih reči i sažetaka. - i/li unesite prezime ili prva slova prezimena autora - i/li izaberite sa liste naslov časopisa
2. - Sadržaje časopisa ovog servisa možete naći ovde '. Sadržaj svih brojeva izabranog časopisa (od 1993. godine) dobićete kada kliknete na časopis sa liste. Nakon obavljenog pretraživanja rezultati se prikazuju u formi tabele sa sledećim kolonama: - naslov rada - autori - info (naziv časopisa, godina, volumen, broj i stranice) Ako kliknete na Detalji dobićete i ključne reči i sažetak tog rada. Ako želite puni tekst rada kliknite na Članak, zatim upišite mail adresu na koju želite da vam pošaljemo članak i kliknete na Pošalji.

Naslov	Carbon accumulation in cotton, sorghum, and underlying soil as influenced by tillage, cover crops, and nitrogen fertilization
Autor(i)	Sainju U M Whitehead W F Singh B P
Abstract	<p>soil and crop management practices may influence biomass growth and yields of cotton (<i>Gossypium hirsutum</i> L.) and sorghum (<i>Sorghum bicolor</i> L.) and sequester significant amount of atmospheric CO<sub>2</sub> in plant biomass and underlying soil, thereby helping to mitigate the undesirable effects of global warming. This study examined the effects of three tillage practices [no-till (nt), strip till (st), and chisel till (ct)], four cover crops [legume (hairy vetch) (<i>Vicia villosa</i> Roth), nonlegume (rye) (<i>Secale cereale</i> L), hairy vetch/rye mixture, and winter weeds or no cover crop], and three N fertilization rates (0, 60-65, and 120-130 kg N ha<sup>-1</sup>) on the amount of C sequestered in cotton lint (lint+seed), sorghum grain, their stalks (stems+leaves) and roots, and underlying soil from 2000 to 2002 in central Georgia, USA. A field experiment was conducted on a Dothan sandy loam (fine-loamy, kaolinitic, thermic, plinthic kandudults). In 2000, C accumulation in cotton lint was greater in nt with rye or vetch/rye mixture but in stalks, it was greater in st with vetch or vetch/rye mixture than in ct with or without cover crops. Similarly, C accumulation in lint was greater in nt with 60 kg N ha<sup>-1</sup> but in stalks, it was greater in st with 60 and 120 kg N ha<sup>-1</sup> than in ct with 0 kg N ha<sup>-1</sup>. In 2001, C accumulation in sorghum grains and stalks was greater in vetch and vetch/rye mixture with or without N rate than in rye without N rate. In 2002, C accumulation in cotton lint was greater in ct with or without N rate but in stalks, it was greater in st with 60 and 120 kg N ha<sup>-1</sup> than in nt with or without N rate. Total C accumulation in the above- and belowground biomass in cotton ranged from 1.7 to 5.6 mg ha<sup>-1</sup> and in sorghum ranged from 3.4 to 7.2 mg ha<sup>-1</sup>. Carbon accumulation in cotton and sorghum roots ranged from 1 to 14% of the total C accumulation in above- and belowground biomass. In nt, soil organic C at 0-10 cm depth was greater in vetch with 0 kg N ha<sup>-1</sup> or in vetch/rye with 120-130 kg N ha<sup>-1</sup> than in weeds with 0 and 60 kg N ha<sup>-1</sup> but at 10-30 cm, it was greater in rye with 120-130 kg N ha<sup>-1</sup> than in weeds with or without rate. In st, soil organic C at 0-10 cm was greater in rye with 120-130 kg N ha<sup>-1</sup> than in rye, vetch, vetch/rye and weeds with 0 and 60 kg N ha<sup>-1</sup>. Soil organic C at 0-10 and 10-30 cm was also greater in nt and st than in ct. Since 5 to 24% of C accumulation in lint and grain were harvested, C sequestered in cotton and sorghum stalks and roots can be significant in the terrestrial ecosystem and can significantly increase C storage in the soil if these residues are left after lint or grain harvest, thereby helping to mitigate the effects of global warming. Conservation tillage, such as st, with hairy vetch/rye mixture cover crops and 60-65 kg N ha<sup>-1</sup> can sustain C accumulation in cotton lint and sorghum grain and increase C storage in the surface soil due to increased C input from crop residues and their reduced incorporation into the soil compared with conventional tillage, such as ct, with no cover crop and N fertilization, thereby maintaining crop yields, improving soil quality, and reducing erosion.</p>

## Pretraživanje abstraktne baze Medline

- ❖ US National Library of Medicine
- ❖ 5 200 časopisa
- ❖ Oko 16 miliona referenci za period 1949 do danas
- ❖ Svaki članak se indeksira u kontrolisanom rečniku Medical Subject Headings - MeSH - 24.500 odrednica, hijerarhijski uređenih na devet nivoa
- ❖ Veliki broj radova se može dobiti i u punom tekstu (uslovljen je pretplatom)

# Pretraživanje baza sažetaka i citata - Medline, Scopus, Web of Science

The screenshot displays the KoBSON website interface. At the top, there are navigation tabs: CPT, SRL, EleČas, EleKnjige, Naši u WOS, Pomoć, and Impresum. On the right side, there are social media icons for RSS, @, and a phone icon.

**Servisi**

**Servisi**

U 2009. godini, iz akademskih institucija u Srbiji, dostupno je preko 35.000 naslova stranih naučnih časopisa u punom tekstu, oko 40.000 naslova knjiga, kao i nekoliko indeksnih baza podataka.

Pretraživanje na KoBSON portalu moguće je obaviti samo prema naslovu časopisa ili knjige. Većina časopisa je u punom tekstu je dostupna od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta.

Za predmetna pretraživanja po člancima upućujemo Vas ili na nekog od agregatora, ili direktno na sajt izdavača.

**Pretraživanje časopisa:**

Spisak svih časopisa koji su na neki način dostupni u bibliotekama Srbije (bilo elektronski, bilo u papirnoj formi), proširena naslovima časopisa koji su imali Impakt Faktor u poslednjih dvadeset godina. Prisustvo časopisa na toj listi je samo pokazatelj njegove dostupnosti, a nikako kvaliteta.

**Elektronski časopisi:**

Skup pretplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

**Indeksne baze**

Indeksne baze podataka sadrže bibliografske podatke o radovima iz časopisa koji su u njima zastupljeni. Za svaki članak dati su detaljni podaci:

- autor rada i institucija
- naslov rada
- naziv časopisa
- godina
- jezik rada
- tip rada
- sažetak

Ukoliko zapis obuhvata i popis korišćene literature, takve baze nazivamo citatnim (*Web of Science, Scopus, Srpski citatni indeks*).

# Pretraživanje abstraktne baze Medline

The screenshot shows the KoBSON website interface. At the top, there are navigation tabs: CPR, SRL, EleČas, EleKnjige, Naši u WOS, Pomoć, and Impresum. On the left, a green sidebar contains a menu with categories like 'KOBSON', 'INFORMACIJE', 'NAUKA U SRBIJI', and 'SERVISI'. The main content area is titled 'Medline' and features a green button labeled 'pristup MEDLINE-u' which is circled in yellow. Below this, there is a section 'O bazi' with text describing MEDLINE as a leading global bibliographic database. At the bottom, a table lists journals indexed in MEDLINE from Serbia.

**Medline**

**MEDLINE**  
*Izdavač: US National Library of Medicine (NLM)*

**pristup MEDLINE-u**

**O bazi**

MEDLINE je vodeća svetska bibliografska baza iz oblasti biomedicinskih nauka. Dostupna je besplatno.

Pored bibliografskih podataka o svakom članku iz preko 5.000 časopisa, uspostavljen je i link do punog teksta. Dostupnost članka u punom tekstu uslovljena je pretplatom na elektronsku verziju časopisa (preko KoBSON-a ili na neki drugi način).

Svaki članak se indeksira orednicama iz kontrolisanog terminološkog tezaurusa Medical Subject Headings - MeSH (<http://www.nlm.nih.gov/mesh/meshhome.html>), koji obuhvata preko 24.500 odrednica uređenih hijerarhijski na devet nivoa.

**Časopisi iz Srbije indeksirani u MEDLINE-u**

	Naziv časopisa	Period
1	Acta chirurgica Iugoslavia	1954-
2	Glas. Srpska akademija nauka i umetnosti. Odeljenje medicinskih nauka	1950-
3	Medicinski pregled	1950-

## Alert

### Korišćenje Alert opcije

Izdavači naučnih baza podataka pružaju registrovanom korisniku mogućnost korišćenja *Alert* servisa. Ta opcija Vam omogućava da sačuvate korišćene upite kako biste ih kasnije ponovo izvršavali. Osim toga, možete ih koristiti kao zahtev za periodično slanje izveštaja o novodotatim člancima koji odgovaraju tim upitima.

Da biste koristili ovu pogodnost neophodno je da korisnik otvori svoj lični nalog (regstruje se) na svakom servisu pojedinačno. Te registracije su besplatne i međusobno nezavisne i nemaju nikakve veze sa KoBSON nalogom.

Postoji nekoliko tipova Alerts obaveštenja:

1. *Search Alerts* – obaveštenja vezana za pretrage. Ako korisnik odluči da sačuva određenu formu i sadržinu pretrage (npr. konkretnu konfiguraciju ključnih reči i imena autora po kojima je pretraživao bazu, slika ispod), ima mogućnost da putem Alerts aplikacije konfiguraciju konkretne pretrage sačuva, a da mu servis automatski šalje obaveštenje na e-mail adresu kada god se u bazi pojavi neki novi članak koji odgovara kriterijumima pretrage.
2. *Volume/Issue Alerts* – obaveštenja vezana za nove brojeve i sveske časopisa. Korisnik može da izabere časopise za koje želi da dobija obaveštenja kada god izađe nova sveska časopisa, naravno pod uslovom da se taj časopis referiše u bazi.
3. *Citation Alerts* – obaveštenja vezana za citiranje izabranih članaka. Korisnik može da traži da mu se za određene članke šalju obaveštenja kada god se u bazi pojavi neki novi rad koji citira izabrani članak.

## Šta je RSS?

RSS (Really Simple Syndication) predstavlja aplikaciju za automatsko preuzimanje podataka sa internet sajtova. Uz pomoć RSS aplikacija moguće je pratiti promene na web lokaciji od interesa bez posećivanja samog sajta. RSS automatski preuzima podatke o promenama na sajtu i obaveštava korisnika o njima. Ako se na sajtu pojavi neka nova vest, tekst ili neki drugi sadržaj, korisnik dobija informaciju o tome.

Postoje dva preduslova da bi RSS funkcionisao:

1. Da web sajt ima RSS aplikaciju, tj. da je moguće preuzimati informacije na ovaj način sa njega.
2. Da korisnik ima aplikacije za čitanje RSS-a, kao i da određenu web lokaciju unese u listu sajtova za RSS informacije.

Ove aplikacije se mogu besplatno preuzeti sa Interneta.

Za istraživača koji želi da prati određene naučne časopise u elektronskoj formi (npr. preko KoBSON-a), RSS predstavlja odlično rešenje, jer se sve promene, tj. pojavljivanje novog broja i novih tekstova, automatski detektuju i informacija stiže direktno korisniku, štedeći na taj način njegovo vreme.

On call. I am a 57-year-old man with a dilemma. I understand from your articles that moderate drinking may help me avoid a **heart attack** like the one that killed my brother. But I've just been diagnosed with hypertension, and I was told that alcohol can raise my blood pressure and **stress my heart**. So I need to know if drinking is likely to help my **heart** or harm my health.

# Pretraživanje pomoću Indeksiranog rečnika - MeSH-a

The screenshot displays the EBSCO MEDLINE search interface. At the top, there are navigation tabs for "New Search", "Publications", "MeSH", and "Indexes". Below this, the "Database: MEDLINE" is identified, with options for "Basic Search", "Advanced Search", and "Visual Search". A yellow circle highlights the "MeSH" tab in the navigation bar. To the right of the "MeSH" tab is a "View Tutorials" link. Below the navigation bar, a search input field contains the text "cancer". To the right of the input field is a "Browse" button, also highlighted with a yellow circle. Below the input field, there are three radio button options: "Term Begins With", "Term Contains", and "Relevancy Ranked", with "Relevancy Ranked" being the selected option.
